CIVIL 33

A Type VK 2100 training press was assembled in 5 weeks for Müller Weingarten ABG, by BMW AG in Dingolfing, Germany

Fagioli Deutschland were responsible for the handling of the pieces with a total weight of 900 tonnes from their delivery to BMW.

The scope of work included:

- The unloading of the components from the delivery vehicles;
- The partial assembly of the press using cranes and a hydraulic gantry in a assembly area;
- The interval transport of the partially assembled press;
- Final assembly and mounting of the press using a second hydraulic gantry.

Above: Internal Transport of a 160 tonne component

Below: Positioning of a 350 tonne component

Below: Erection of the sidewalls.
