POWER 10

**Above:** Boiler Module on a 10 tonne SPMT (self propelled modular transporter)

Fagioli Deutschland performed a feasibility study for the transport of boiler modules to the Fortum Power Station in Burghausen, Germany. Subsequently Fagioli Deutschland were awarded the contract to deliver 24 modules each

having dimensions of 26m x 3m x 3m. The modules were delivered into a storage area on site where they were later manoeuvred under the lifting arrangement using the same transporters.
